128 Years of Freethinking!

Imagination and the Decentralization of Power

*The work that I am engaged in as both a reporter and a researcher is cumulative. Starting with the publication of the book **The Secret Behind Secret Societies**, subtitled **Liberation of the Planet in the 21st Century**, there has evolved a series of taped programs, because that is the simplest and fastest way to continue to research and discuss the two traditions laid out in the book.*

One is called the Formula of the Secret Society, and the other the Tradition of Imagination.

— Jon Rappoport

Zecharia Sitchin

Are We Alone? – Zecharia Sitchin

This stunning film is based on Zecharia Sitchin's best seller "Genesis Revisited." He states that 300,000 years ago spacefarers from Nibiru, the 10th planet of our solar system, colonized our Earth and by genetic engineering created Man in their image and likeness. They were the gods of the oldest people known to us, the Sumerians of Mesopotamia, who referred to them as the Anunnaki — "those who from Heaven to Earth came." Scientists of our time agree that calculations tend to confirm the accuracy of the Sumerian creation tale. Video, approx. 53 minutes

SITCHIN STUDIES DAY
Zecharia Sitchin asks:

- What if the myths told by ancient peoples are not figments of imagination but records of events that had actually taken place?
- What if the biblical Book of Genesis is not a creation myth, but a condensed rendering of an accurate cosmogony and sophisticated knowledge of evolution? Essays by: Madeleine Briskin, Marlene Evans, V. Susan Ferguson, Neil Freer, J. Antonio Huneus, Father Charles Louis Moore. 164 pages • ISBN 0-787234-57-3

An Evening with Zecharia Sitchin

Zecharia Sitchin talks of his concepts, presenting "The Enigma of Ancient Knowledge" — a comprehensive in-depth review of mankind's extraterrestrial origins and cosmic connections, and much, much more. Zecharia reveals various unusual structures on Mars and what looks to be the grid of a large ancient city, long since abandoned. According to Zecharia Sitchin, if a life form did exist on Mars at one time, it could have been more than just microbes.

THE COSMIC CODE

Between Fate and Destiny Lives Man

Many thousands of years ago, a race of extraordinary beings guided the evolution of life on Earth — determining the existence and nature of mankind as we know it today. All-powerful, all-knowing, the proof of their genius is apparent in the mysterious monoliths at Stonehenge, and in a strange but highly significant structure of concentric stone circles in Israel's Golan Heights — both requiring sophisticated astronomical knowledge. Teaching man to look to the heavens, they bequeathed to us the Cosmic Code. From deep inside ancient Sumerian texts that pre-date even the Bible, Zecharia Sitchin dares to reveal the nature of prophecy and historical truths that have long been obscured by disbelief and misunderstanding: the code used to construct our kind by master builders from the stars.

From Atlantis to the Sphinx

“The purpose of the hunting rituals of Cro-Magnon man was magical, and evidence of modern anthropology suggests that they worked. They worked because ancient man knew a secret we have forgotten — how to make use of the collective unconscious.”

Atlantis & The Earth's Shifting Crust

Rand & Rose Flem-Ath

Two decades of research into the fate of Atlantis draw upon and extend Charles Hapgood's theory of catastrophic earth crust displacement. Through the examination of ancient maps and a reinterpretation of Plato's enigmatic account, new evidence emerges that supports Hapgood's model and suggests that as the result of such an event, the mysterious lost continent may lie beneath the ice of Antarctica.

Lee Davis — Long before 1492, people in North America were proficient at representing their concepts about the cultural geography of space. A Celestial Interpretation of the Hall of Bulls from the Cave of Lascaux

Frank Edge — Prominent patterns of dots associated with the Great Bull images in the Cave of Lascaux can be shown to correspond to star clusters in the constellation of Taurus at the time of summer solstice in 15,000 B.C. It would require the artists to crawl for hours in darkness, through passageways barely wide enough for a human body, and sometimes to hang from a cliff on a rope, in order to produce these paintings.
